

High Quality Electrical RFID Key Card Energy Saver/Energy Saving Switch

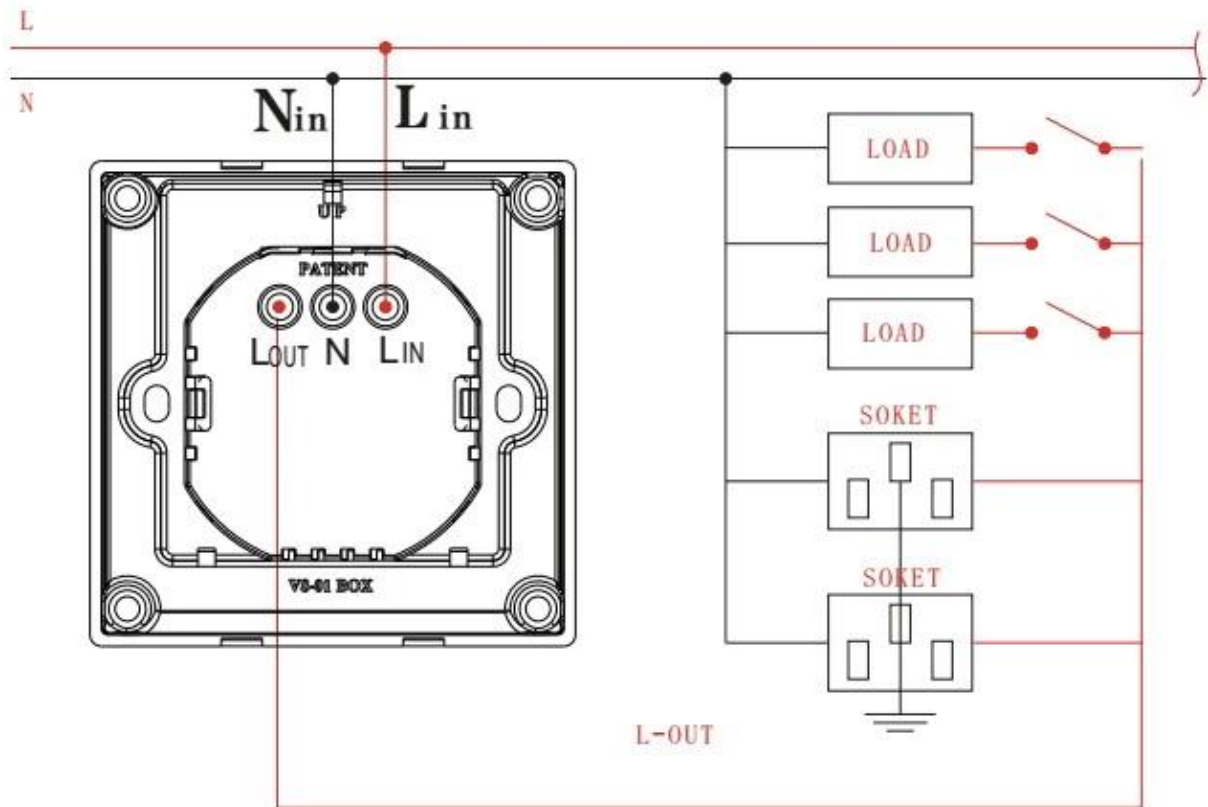

**MIFARE CARD
INSERT TO GAIN POWER**

wire connection

CONNECTION DIAGRAM

Where to use the energy saving switch:

The energy saving switch is for hotel lock system, to control the power in the room by the guest cards easily.

NOTE: It is optional for the hotel project, the hotel lock system still working without Power Saver.

What benefits for the hotels if use energy saving switch?

Economy Benefit:

Saving power: The delay function is very important in the Energy Saving Switch, without it, the guests have to leave the room in the dark. The consumption of the illumination system in each room in the hotel is about 2000 watt.

Security Benefit:

Improve hotel safety: If the guests forget to turn off all the electric appliances when they leave the room, which will be a great waste and it's very insecure. While their leaving, it is difficult for the waiter to know whether the lamps are turned on or not in the rooms. So we specially developed the Energy Saving Switch for the hotel to save the substantive regrettable consumption.

Convenient Benefit:

Insert room card (guest card) to get power for light and TV etc. Guests don't need to spend time on finding where to get power. When they get out the room, don't need to shut the power one by one. It saves a lot time!
