

BLUETOOTH ACCESS CONTROL

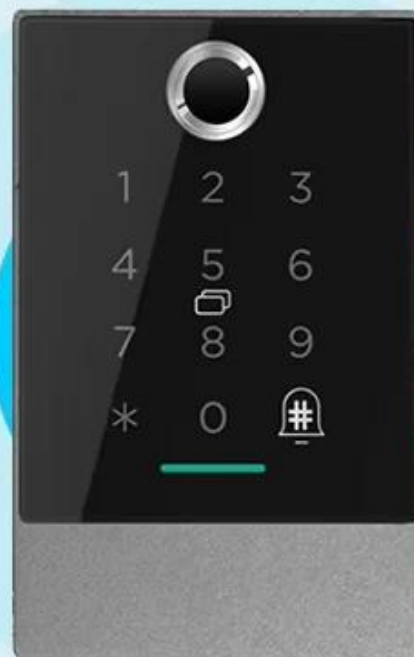

Semiconductor Fingerprint Sensor

Bluetooth door open

Support 27 international languages

Open the door through the mobile phone
APP electronic key induction,

Password unlock

Easy access to fingerprint wear

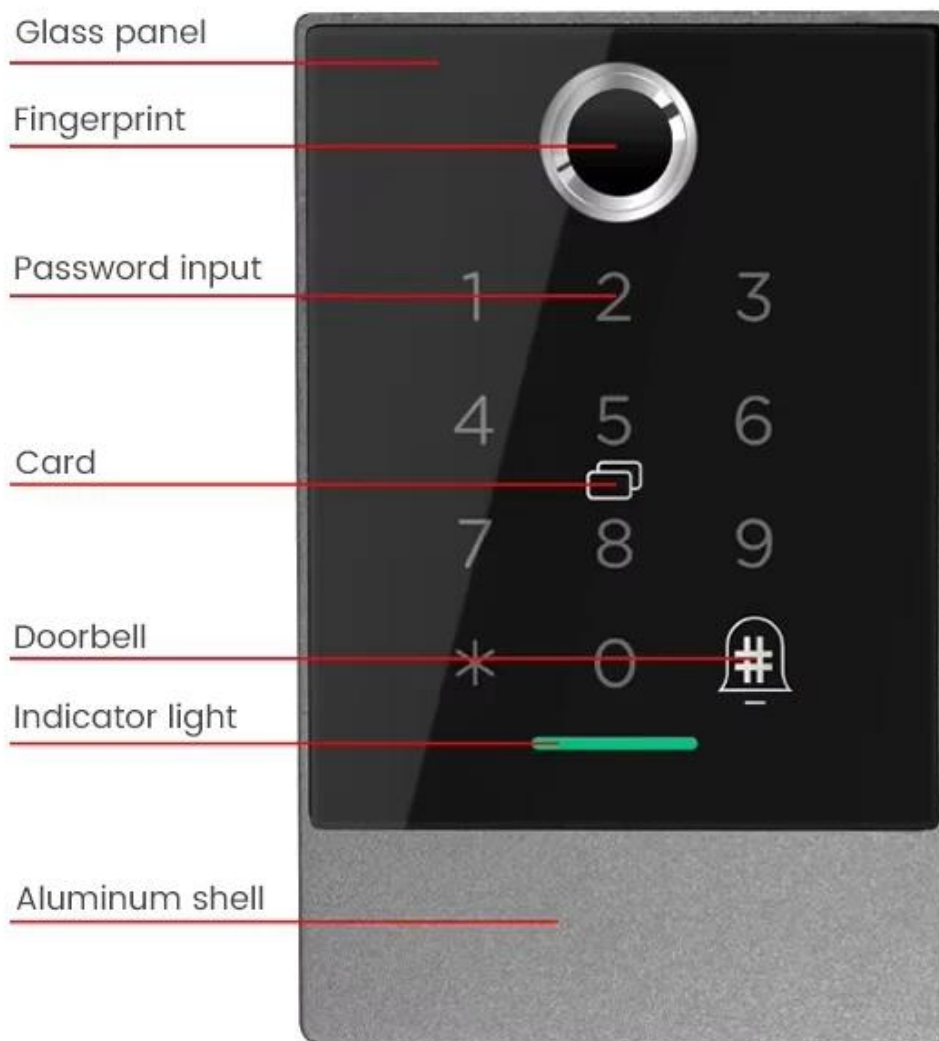

Card unlock

Powerful memory, can store 20,000 cards

Product description

Aluminum alloy material, strengthened glass panel

K2/K2F

Bluetooth intelligent access control

APP Bluetooth unlock
Card unlock
Password unlock
Fingerprint unlock(K2F)
Send key or password remotely
Limited time password (exclusive)
Limited time password modification (exclusive)
password protection
Password revocation (exclusive)
Automatic lock
Low power consumption
Low voltage alarm
real time monitoring
Cloud backup key
Remote login
Gesture password
SMS notification
Record query

Technical Parameters

Size: 79mm x 125mmx 15.5mm	Communication Mode: Bluetooth 4.1
Material: Aluminum Alloy / Tempered Glass	Unlocking time: about 1.5 seconds
Power supply: DC12V	Card capacity: 20000
